

Usage Instructions for Catalog Tool

1. Enter the zip code of your project installation location
2. Select a product category
3. Choose a utility provider from the list
4. Modify the default wattage and annual hours for the most accurate results
5. Click the cut sheet icon for additional product information
6. It's that simple
7. Bookmark this page in your browser for quick access to the HALCO REBATE TOOL
- rebate programs are constantly changing, so check back often!

Usage Instructions for the Payback Tool

1. Fill out all the information about your project below, including pre and post fixture quantity and type
2. The hours of operation has been defaulted to 4,000 hours. If you have a more accurate HOU, you can override that field.
3. If you have multiple lines you'd like to include, click the green + icon on the top right of the screen. You can use the arrows to toggle between lines.
4. Enter your zip code and choose the correct utility to generate utility rebates. This will also help to improve the accuracy of the energy savings calculations, as we'll pull in your utility's average C&I electric rate, which can also be overridden.
