

**FOR IMMEDIATE RELEASE**

### **Halco Lighting Technologies® Expands Line of HID Retrofit Lamps**

**Norcross, GA. March 17, 2016** – Halco Lighting Technologies recently expanded their line of HID Retrofit Series of LED lamps with the addition of three mogul base (E39) lamps. The new mogul base lamps join the current HID retrofit product line of E26 base lamps that features 20 watt, 36 watt, 45 watt, and 54 watt versions.

“The addition of the mogul based versions of our high performance HID Retrofit family of LED lamps provides even greater application versatility,” said Rob Freitag, director, product development and marketing. “And we are committed to continuing to expand this family of lamps to help our customers with high quality lighting solutions.”

The three mogul base lamps are available in 36 watt, 45 watt, and 54 watt versions and are all DLC qualified. The LED Retrofit Lamps are designed to replace up to 200 watt HID lamps and can provide energy and maintenance savings of more than 75% compared to HID systems.

Like the other HID Retrofit lamps in the family, the mogul base lamps have a color temperature of 5000K with a CRI of 82. The lamp is UL listed and has a 50,000 hour rated life. This easy to install LED lamp is a great solution for post top and high bay fixtures where sockets are in a base up or base down orientation.

The new Halco HID Retrofit Series mogul base lamps are a great addition to the HID Retrofit LED lamp family that can be used for those luminaires that need a quality, long-lasting solution along with great energy savings. Designed for indoor or outdoor use, each lamp is UL Listed for damp locations and rated for use in enclosed luminaires. As always, it features the Halco Lighting 5-year limited warranty.
