Halco Lighting Technologies® Introduces Three New IP65 Rated Lamps

Norcross, GA. (December 28, 2015) – Halco Lighting Technologies introduces three new IP65 rated LED lamps to their ProLED line. IP65 rated lamps are rated for use outdoors where exposed directly to water from rain or irrigation. Two LED JC lamps and an LED wedge base 912 lamp add to the Halco Lighting current selection of lamps geared towards landscape lighting, including Sollos Landscape Lighting.

“In designing this latest generation of JC lamps, we took the approach of not only producing a rugged IP65 structure, but also in providing the smoothest lighting distribution in the industry,” claimed Rob Freitag, director of product development and marketing for Halco. “Providing quality lighting performance is always our first priority in every lamp and luminaire we produce.”

The new omnidirectional JC2 and JC20 LED lamps feature a G4 base. With a lumen output of 250 and a CRI of 82, these 2.3 watt lamps create superior light with very little power. The lamp design uniformly illuminates pathways better than any other JC lamp in the industry, creating a more attractive appearance with smooth, even illumination. The JC2 comes in a 2700K and the JC20 is 3000K. Both lamps have a useful life of 40,000 hours and are backed by a 5-year warranty.

The new omnidirectional 912 lamp features a wedge base. With a lumen output of 120 and a CRI of 82, this 1.2 watt lamp is a nice compliment to the current 1.0 watt and 2.3 watt wedge base lamps in the Halco product portfolio. The superior thermal construction gives it long life and energy efficient illumination. The 912 wedge comes in a 3000K, replaces traditional 10 watt halogen lamps, has a useful life of 40,000 hours, and is backed by a 5-year warranty.

All three lamps can be used in the Sollos line of landscape products. Halco Lighting lamps standard 5-year warranty is extended to 20 years when used in Sollos Landscape Luminaires. For more info on Sollos Landscape Lighting please visit www.solloslighting.com.
